## IMAGERY INFORMATION REPORT

MISSILE ACTIVITY AT EMBA MISSILE TEST CENTER  
LAUNCH COMPLEX, USSR

Two missiles were seen on the three-rail Area A TEL at Pad A-2 of  
Emba Missile Test Center Launch Complex (Figure 1).

25X1

25X1

25X1

They had an apparent bulge aft of the forward end and fins at the aft end. The measurements are different from those of any known tactical surface-to-air missile observed to date. However, because of the obliquity of the photography and other limiting factors, the missiles may be longer than they appear to be and thus similar in size and configuration to the SA-6 (GAINFUL) missile.

25X1

The Area A TEL has been seen four other times with missiles.

25X1

missiles were mounted on the TEL. The measurements and shapes of these missiles were similar to those of the SA-6 (GAINFUL) missile.
